

Dental Herb Ingredient Story

The Most Highly Effective All-Natural Oral Care Products Made with Truly Natural® Ingredients

For centuries, pure essential oils and herbs have been used because of their unique antimicrobial and healing properties, as well as their ability to maintain and condition healthy tissue. When used in dental care, essential oils are absorbed deep into gum tissue where their potent antibacterial properties provide valuable benefits in the treatment of gum disease and halitosis. Herbs and their beneficial properties have been safely and effectively used in oral care for thousands of years. Botanicals are powerful in minimizing harmful oral bacteria, combating bad breath, and promoting healthy teeth and gums.

Dental Herb Company formulae are precisely calculated, using powerful essential oils and organically grown herbal extracts. The products contain effective **Truly Natural® Ingredients** that help stop bleeding gums, relieve sore inflamed gums, rebuild connective gum tissue and fight bad breath longer. A little goes a long way.

Essential Oil	Properties	Clinical Benefits
 <p>Cinnamon Bark</p>	An astringent and a painkiller.	Helps contract, firm and strengthen oral tissue, reduce surface inflammation and irritation, and create a protective barrier from infection; soothes toothaches.
 <p>Eucalyptus</p>	Aromatic, antibacterial, antifungal, antiseptic and stimulating.	Helps boost circulation and speeds the healing process; effective against mouth ulcers and oral infection.
 <p>Lavender</p>	Aromatic, sedating, antibacterial, anti-inflammatory, antimicrobial, antiseptic and stimulating.	Effective against halitosis, helps heal damaged tissue, provides mouth pain relief and helps calm the nervous system and decrease stress, which is strongly linked to gum disease.
 <p>Peppermint</p>	Antibacterial, anti-inflammatory, antifungal, antimicrobial, antiseptic, sedating and stimulating.	Offers protection from oral infection, and pain relief. Enhances blood circulation.
 <p>Thyme</p>	Antibacterial, anti-inflammatory, antiseptic, and stimulating.	Helps treat oral inflammation and infection.
Herbal Extract	Properties	Clinical Benefits
 <p>Echinacea</p>	Antimicrobial, anti-inflammatory and immunomodulating.	Helps prevent infection, repair damaged tissue and regenerate connective tissue.
 <p>Gotu Kola</p>	Anti-inflammatory and soothing.	Stimulates blood vessel growth in connective tissue. Helps heal wounds.
